Remarks

The following remarks are responsive to the rejections in the Office Action, dated October 10, 2010,

Status of the Claims

Claims 1-15 and 22 allowed.

Claims 18 is canceled.

Claims 19-20 and 23-24 are pending.

Allowed Subject Matter

Applicants note with appreciation that the Examiner has indicated that Claims 1-15 are and 22 would be allowable.

Pending Claims Claim Rejections – 35 U.S. C. 112[2]

The Examiner rejected claims 18-20 and 23 as being indefinite.

Claim 18 was canceled and its subject matter has been rewritten as new Claim 24 for ease of reading and for ease of examination. It is submitted that the reorganized list of device is more suitable and addresses the Examiner's concerns. No new matter is introduced.

Claim 19 has been amended to address the Examiner's comments regarding the different functions of the electrodes. It is submitted that the change from at least one electrode to at least two electrodes does not introduce new matter in view of the fact that having more than one electrode is an inherent, well-known feature of a thin film field effect transistor and the claim now further recites that at least one anode is the electrode having the further recited subject matter.

Applicants submit that in view of above amendments and remarks, the pending claims are now in condition for allowance. Applicants respectfully request that this rejection be withdrawn.

Conclusion

Should there be any questions about the content of this paper or the status of the application, the Examiner is invited to call the undersigned at the telephone number listed below.

Respectfully submitted,

/John H. Lamming/
